## **VOYPP 1.0 Tutorial** Info uploading to SKUs' slots

Access the **SKU list** menu, create the slots you need (1) - max. 10, then access each slot to upload specific information. Each slot contain only one type of information: vimeo (video hosted on external server), video (video hosted on voypp server - for countries which banned youtube/vimeo etc. - i.e. China), imagine (.jpg, .tiff, .png etc., with diverse responses (full image, link file (another image, pdf. - these files are loaded on voypp.com server), URL link, e-mailing, telephone call).

Note: video/graphic materials creation or editing are not included in these activities.

Possible actions of the image after loading: Full - image will enlarge on full screen width, Url - opens a web link, File - will open a file from the server, e-mail - opens an e-mail window, telephone - opens a dial window.

רקקץ€ע

## **VOYPP 1.0 Tutorial** Publish the SKU & get QR code and URLs' link

After filling and saving the first slot, you can generate the SKUs' QR code and URL link. These elements are not changing, regardles the SKUs' later updates.

Note: with this link and QR code, you can start ordering the encoded QR labels or NFC tags. As the production of these labels/tags will require time, we recommend you start with this ordering, immediately you get the link. You will have enough time to proceed with the SKU information update.

The QR labels or NFC tags you can produce with Voypp or with any other agreed supplier. The SKU link you can use immediately in internet display campaigns.

The SKU-ul is not active before the payment of the value of the active slots (minimum 1 month) - if you choose to pay online, this operation being necessary every time before expiration of paid period, to avoid disconnecting the link from the platform.

Into the case of signing a separate contract, the activation and payment of the SKU will be realised upon this agreement.
